Subject:	Submission against the Narrabri Underground Mine Stage 3 Extension Project
Date:	Tuesday, 22 February 2022 4:56:13 AM

Dear Concerned investigators into the impact of this submission,

I wish to add my name to the ten very valid objections raised by the Nature Conservation Council. Please help lead the planet to a better future, with consideration for all peoples. The life of coal is limited in the current climate, not just of the planet- but of public opinion as well. Please show leadership on this issue.

Yours sincerely,
Sally Humphrey.
