Mr Thomas Watt  
A/Team Leader  
Resource Assessments  
NSW Department of Planning & Environment  
23-33 Bridge St  
GPO Box 39 Sydney NSW 2001

11 August 2016

Dear Mr Watt

I refer to your email dated 8 August 2016 providing the opportunity to comment on the draft conditions of consent for the Airly Mine Extension Project (SSD 5581).

As you are aware, the EPA provided a response to the Department of Planning and Environment on the 21 January 2016 regarding the draft conditions of consent supplied to the Environment Protection Authority (EPA) on the 13 January 2016. The EPA understands that no alterations have been made to the conditions of consent that require comment from the EPA. The EPA is therefore supportive of the conditions of consent as proposed.

Should you have any further enquiries in relation to this matter please contact Mr Allan Adams at the Central West (Bathurst) Office of the EPA by telephoning (02) 6332 7610.

Yours sincerely

Dear Thomas

**RE: Airly Mine Extension Project (SSD 5581) – draft Conditions of Consent**

Thank you for your invitation for the Office of Environment Heritage (OEH) to comment on the draft Conditions of Consent for the Airly Mine Extension Project.

Both Regional Operations Group and National Parks & Wildlife Group of OEH have reviewed the draft Conditions of Consent and note that the conditions are detailed, stringent and address the potential issues raised by OEH.

OEH would welcome early consultation with Centennial Coal during preparation of the Biodiversity Management Plan for this project.

If you have any questions regarding this matter please contact David Geering on 02 68835335 or [david.geering@environment.nsw.gov.au](mailto:david.geering@environment.nsw.gov.au).

Yours sincerely

**STEVEN COX**  
**Senior Team Leader Planning, North West Region**

**Subject:** Re: Revised Airly Conditions

Clay

I refer to the latest draft conditions of development consent for the Airly Mine Extension Project, which is received from your e-mail today and titled "Airly MEP\_App H\_Conditions v10\_CP.DOC".

I make the following comments:

1. I do not have residual concerns and I support the above-mentioned latest draft conditions of development consent in relation to the management of subsidence impacts on the cliff lines at the subject site, and
2. I am of the view that the above-mentioned latest draft conditions of development consent will enforce the recommendations / findings by the Independent Review Panel in their report dated 1 July 2016 and titled "*Accuracy and Reliability of Mine Subsidence Impacts on Sensitive Features Across the Airly Mine Extension Project Application Area*".

Kind Regards

Dr. Gang Li | Principal Subsidence Engineer
