

Thank you for allowing me to speech on behalf of my husband and myself.

We live on Grassy Creek Road at Rye Park and are non involved landholders. We will have full view of some of the wind turbines. We have no problems with them.

Everytime I go to Boorowa I see the power lines late in the day comming home the suns reflection from them makes it very hard to see.

I understand there will be employment for about 260 people during their construction this can only be beneficial for Rye Park. Also the money the company will put into Rye Park to improve the village would be great

I think the country will run out of electrecty in the future and wind farm are the way forward. They are a much cleaner way of producing power.

Thank you for giving me this time
From Sylvia Pearson.
