

Dear Pac.

My name is Toppy Stojadinovic.

I am a land owner and a wind turbine host in the proposed Wind Turbine Farm located at Rye Park. Initial plan for my Farm was SIX Turbines. I thought that was great. The income from the rent would allow me to make improvements to marginal farm, eg. Pasture,water,fencing,weed control, stock maintenance etc. Then due to planning changes I lost THREE Turbines,so I had to rethink my plans by 50%. The income from the Wind Farm is crucial to me with out it the Farm wont survive. Another benefit is all the extra money that will come to all areas of the community and the local Economy. Then a month ago I found out that the last THREE Turbines on my Farm are to be removed So that leaves me with no extra income to do any extra improvements to make the farm viable. Even worse was when I was told that it was because of VISUAL IMPACT. At first I didn't even know What it was. When told I had to laugh and said you are joking. Some one in RYE PARK VILLAGE is Standing in his back yard having a coffee and seeing a part of a Turbine on my property and doesn't like it. Does that mean it has to be removed. Remember my Farm is SEVEN kilometres from the Village of RYE Park. He must be looking through binoculars. Five minutes later he will go away from His house to work and not be back for the day to look at my Turbine.I didn't think this could even be Considered . I urge you to use common sense and reinstate my Turbines to my Farm and the rest to The Wind Farm. Make it the great project that it was planned to be,that will benefit all in the local Area.

Kind Regards

Toppy Stojadinovic.
