Subject: Attn: Matthew Todd-Jones re Rye Park wind turbines
Date: Wednesday, 5 April 2017 2:02:55 PM

Dear Mr Todd-Jones

I am writing to express my support for the proposed wind turbines to be erected in Rye Park, NSW. I do not consider the turbines to be unattractive, far from it, and I have seen other more unattractive sights in the village of Rye Park.

The proposal will benefit not only those landowners who will have one or more turbines installed on their property it will also provide local employment opportunities as well as funding to improve the visual amenities in the village and to improve the access roads in and around Rye Park. And best of all, it will provide a source of affordable energy that's considerably safer than coal powered or nuclear energy.

Yours sincerely.
