

TO THE PLANNING ASSESSMENT COMMISSION

My Personal View on Wind Turbines.

NO 1 gives clean Energy = cant get better than that.

NO 2 We need to get serious with our renewable energy. / not a candle on the table.

NO 3 Turbines to me are fascinating

NO 4 At the Buller's Range on the Kluge Highway I have seen people taking photos of the Turbines, Plus the fact there is a truck stop nearby and I guarantee they dont get sick from the turbines or they wouldnt park there if they thought they would get ill.

5. If this project doesnt go ahead it will be a big loss to our community. The Buller's Wind Farm supports the local community such as funds to build a hall to hold these functions in, plus Gunning's Dalton sheds are given on going grants to support these needs as well.

6. Farmers have struggled over the years financially and to have the turbines bringing in an income would be a big benefit to all concerned.

7 also people who bought or built in the area already knew there were to be turbines built, but are protesting against which I cant comprehend the mentality of this small group, as we all know there is a crisis with power, and we must look forward and do something. I recently spoke to a few locals and asked if they knew the people who are against the turbines that were at the Beerawa meeting and the comment was they didnt know them, apparently they have no connection or involvement with the community.

I thank you for your time.

yours

Elaine Steward
