

17/5/17

I support this Springvale Water Treatment Project for multiple reasons:

1. I can keep my job, which pays the bills and provides for me and my family. I won't have to move or travel further to work.
2. The local community keeps around 600 workers and their families, which would otherwise have to move out of town. A shrinking/dying town has less sporting clubs, such as footy, netball, Mt biking, local pool and sports grounds. A smaller town has less variety in terms of restaurants, shops and has less government services such as schools and hospitals.
3. As a recreational user of Lake Lyell and the rivers around the dam, I, the locals and the tourist will have cleaner water to fish, swim and boat on.
4. Keeping the power station open helps keep power costs down for energy consumers like you and me.
