Subject: Request of information for committee and community- Da 17/1092 proposed Wallacia cemetery development
Date: Tuesday, 30 October 2018 5:17:34 PM

Good afternoon Matthew,

Thank you for your email correspondence 03.10.18 please note our new email address for your records.

As advised on 3rd October, our committee met with our members and community on October 9th for an update of where our DA was currently at ,as to assist our community with their concerns associated with a large cemetery development in the village. I presented the information in your email at our meeting and the community and members requested the committee to seek further information .

Please can you answer the following questions for our understanding of IPC procedures and processes.

1. Our committee and community are concerned that the process of sharing information was not as we had been previously advised.
A letter dated 01.08.18 regarding DA17/1092 including important information was posted on the internet IPC website for viewing on 05.10.18. There was no notification emailed out to interested parties that had signed up to IPC website as contact for updates. Why was this so? This was not as procedure, we had signed on to IPC website for notification of any changes. This did not happen.
2. Will we be assured that future updated correspondence regarding our DA will be emailed as procedure states to interested parties that have signed up to website contact list for these updates?
3. Please could we obtain from IPC a clear diagram of the decision making process with time frames? As this cemetery development is opposed by our community we need transparency and notification of all changes and updates to this DA.

Thank you for your understanding and attending to these matters for our community.

Regards

Jane McLuckie.
President.

Wallacia Progress Association.
