Subject: Proposed Bylong coal mine
Date: Thursday, 15 November 2018 7:17:17 PM

Hi

I have read the eloquent and accurate opposition letters provided by informed everyday people on this proposal. In words you may be better able to understand. What the f@uck are you doing? Everyone with any sense of understanding of the state of Australia and the world knows the environment and planet are in serious trouble. Look into your heart, listen to your children and young adults who seem to grasp the concept, and STOP DESTROYING THE PLANET AND EARTH - profit cannot come over the environment and how we live within it. My family has worked in mines and were proud of the role they played in Australia's economy but now it has a different perspective and no longer accepting.

Lock the Gate and get the hell out of Bylong. We are a creative country, we can find other economic options.

Kind regards
Chris Byrnes
