

Objection to the Dartbrook Coal Mine Modification 7 (DA 231-7-2000 Mod 7)

My name is ...DEREK RAYMOND FINTER

My address is... [REDACTED]

I object to the Dartbrook coal mine modification as referred to above.

I understand that there have been a substantial number of detailed presentations by experts to demonstrate the Proponent's application did not address many important issues; and in other cases that the details in the application were wrong, including:

1. Impact on the Special Economic Zones for the Equine and Viticulture industries,
2. Economic outcomes for Australia and NSW,
3. Water
4. Noise,
5. Landscape,
6. Aboriginal and early Colonial heritage,

In view of the Rocky Hill Mine decision regarding CO2 emissions, and new development of coal production should be considered as not being in the best interest of humanity.

Therefore I believe the Modification should be refused.

16h April, 2019.
