The Independent Planning Commission N.S.W.
Re St Aloysius College Redevelopment - 5508669

Dear Sir or Madam,

Thank you for the invitation to comment on this scheme. I am one of those people, who you suggest, just don't like public speaking, and I can't type!

My husband and I moved to 72 Carabella St in 1985. Over the time the harbour tunnel was under construction, on occasions we experienced walls breaking away from ceilings, plaster cracking on walls, and electrical appliances vibrating on the floor. This was a distance away.

In 2014 we moved to 74 Carabella St, each time backing onto Crescent Place from where we come and go. A laneway width away.

This development plan is of great concern to us, the excavation work being the greatest. The size and scope of the works, the issues of use for sporting activities, the traffic congestion and us all being on the same rock shelf spell disaster for those of us backing onto Crescent Place.

We appeal to you to defer this Concept Plan until these difficulties are overcome.

Yours faithfully
Margaret Booth.
