To the IPCN

I am writing to object to the Deep Creek Quarry. Not only is it incompatible with the biodiversity and local residents, it is also unacceptable in terms of traffic.

I have been a resident on Italia road for nearly 20 years and we currently have 3 quarries that are trying to be approved that, if approved, will increase trucks travelling along Pacific highway by 1000 per day. On an already dangerous intersection of buckets way and Pacific highway, I think to approve another 50 quarry trucks an hour trying to cross Pacific highway is completely disregarding the safety of other road users.

I therefore think that the Deep Creek and all other quarries in the region should be held back until a proper investigation of cumulative impacts on biodiversity, air, noise pollution and traffic is conducted.

Regards

Charlee Connor
