RE: Eastern Creek Energy from waste Facility SSD6236

To Whom It may Concern

I have been a resident of Minchinbury for over 15 years.

I am extremely concerned about the proposal for the Eastern Creek Incinerator.

My home is only 800 meters away from this site and I am afraid to what toxic poisons will come out of the huge stacks.

Materials that will be burned would release poison in the air that can cause cancers and many other health concerns.

I have a young daughter and I am frightened how this will affect her health. If this was to go ahead she will not be able to play freely in our own back yard.

This facility will be built close to so many schools, preschools and homes. So many people and suburbs would be affected.

I have knocked down my home and currently rebuilding. This should be a happy and exciting time for my family but instead we have the constant worry if we are doing the right thing.

The worry of this incinerator so close to my home is a great concern firstly because of our health and secondly our home would hold no value.

No one would want to buy a house with the view of chimney stacks spewing smoke and toxins 24/7.

All we are asking for is the right to live and breathe fresh air. There is enough pollution out in the west and we do not need anything else adding to it.

On behalf of me, my family and thousands of people, please stand up for us and put a stop to this dangerous incinerator.
