Singleton Heights NSW 2330

Dear Commissioners,

The Mt Pleasant Mine extension (MOD3) is an investment in the future of the NSW mining, supporting the local community in which they operate, generating much needed export revenues, including state royalties, thereby benefiting all citizens of NSW and Australia.

This extension will ensure long term employment for employees and contractors at the mine.

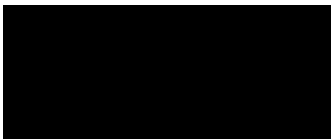

There is quite substantial negative media attention to coal and global warming in this country, however in my opinion, this conversation is incomplete and needs a comprehensive review to discuss and be inclusive on all global warming issues.

The conversation needs to address the long-term poverty in third world countries, how to improve their lives and build a sustainable world. In the short to medium term coal is a commodity that can improve the lives of all citizens of this planet.

As our world advances to an uncertain future, governments and businesses of the world, if they have the drive and vision to implement wide ranging policies of sustainability to ensure equality for all world citizens, then coal may no longer be required.

Please register my strong support for the Mt Pleasant Mine extension (MOD3) extension.

Your truly,
