

To whom it may concern,

I write concerning the Mt. Pleasant MOD3 application. I am employed at the Mt. Pleasant site as a construction superintendent. This project has given my family stability in what has been an uncertain time in the construction industry and would very much like for this to continue beyond 2020. Through my position here I am able to support both my family and community in various ways and the approval of MOD3 would ensure that I can continue to offer this support.

My wife and I have a 12 year old daughter who has just entered high school and being able to give her a stable home life from which to realise her potential is the most important thing in the world to me. MOD3 approval makes that aspiration attainable. MOD3 approval will give all of us at Mt. Pleasant certainty for the foreseeable future and allow time to prepare the SSD application. It will also allow the Mt. Pleasant team to meet community expectations regarding the landform design. MOD3 is, in many ways, the key to the future of Mt. Pleasant and the team who are reliant on this project for our livelihood. We all believe in this project and in the role it plays in supplying energy to the world. Approval would mean certainty into the future.

Thank you for your time.

Regards,

Angus Barrey
