

I am a host to a part of the Crudine Ridge Wind Farm (no turbines allocated) and can only say what I have previously in my last submission and that is I fully support this project going ahead.

I would also like to say, I find it very hard to believe that some of the people that are on the side of “don’t upgrade the Aarons Pass Road” come from a long distance away from that area (data can be found on internet), and may never use that road and don’t have any intension of ever using Aarons Pass Road. I don’t understand why these “against people” would deprive the people that have to use this road. I find it unfair.
