

To Whom it May Concern

I John Joseph Hundy, being a community member of Pyramul and also Crudine Ridge Wind Farm landowner host, wish to voice my support for the project and the upgrade of the Aaron's Pass Rd. The benefits of the project to the local community and wider businesses that are involved in the construction and ongoing operations are considerable. CWP has made considerable adjustments to the project to appease concerned residents. The larger picture of climate change needs to be addressed in a scientific and logical manner. The introduction of different renewable technologies, eg wind, solar, tidal, thermal and technologies that we haven't even thought of, need to be adopted in a timely manner to avoid drastic changes to our environment. These are occurring at an increased rate and time is running out for us to address this problem, which our children's children will inherit if appropriate action is not taken. Unfortunately the minds of the opponents to the Crudine Ridge Windfarm, will not be changed by any facts. The need for this project to proceed along with many other renewable projects to stem the out pouring of greenhouse gases from the fossil fuel industry, is imperative for the future of our planet. I wish that all members of the community could agree on this project but I know this is not possible. I would like to point out that all projects have people disagreeing with construction and progress, and if they were all stopped our civilisation would not have progressed past the caves.
