

Independent Planning Commission. 3/10/2020

I am writing with concern about Wollongong Coal wanting to extend the Russell Vale Coal mine under the Illawarra Catchment. The Company is insolvent as I understand, pays no tax and has already been censured for safety breaches. If this mine goes ahead many negative consequences will follow, including poor health impacts, undermining of the water supply, environmental pollution along with additions to NSW's greenhouse gas inventory.
