

Jamberoo Valley Ratepayers and Residents Association discussed the Boral Sandmining proposal at our general meeting of 26 October 2020, and the meeting unanimously agreed that we wanted to lodge our community's concern about the project.

In Jamberoo we may not be directly affected by the obvious risks associated with noise, dust, and the disturbance of toxic bloom and other pathogens, although we feel strongly that Boral should be taking these issues seriously.

We care very deeply as citizens, however, about the but the loss of the Bangalay sand forest vegetation and the destruction of Aboriginal artefacts and sites. Those represent permanent losses to our environment and culture, for which our society will never be able to make amends.

Please consider putting the brakes on this project.

Ros Neilson, Secretary, Jamberoo Valley Ratepayers and Residents Association Inc.
