Re: Malabar Resource's Maxwell Coal Underground Mine Project

I support Malabar Resource's Maxwell Coal Underground Mine Project.

I believe the project will provide significant benefits to the local and wider community primarily through the creation of direct and indirect employment. I believe that concerns from the community and potential risks to the environment will be managed or mitigated.

I strongly believe that the Hunter Region requires projects like the Maxwell Coal Underground Mine Project to maintain the economy and provide employment. Accordingly, I fully support the project.
