Would you like a coal mine in your locality?

Would you agree to be deprived of sleep?

Would you like to have constant dust on your homes, cars, clothes and if it is clearly visible on these everyday items one can only imagine what effects it has on one's health and lungs.

Would you appreciate a high noise level?

Would you like your journeys to be affected by constant wide-load convoys?

Would you like to be in danger of losing your water supply?

I would imagine that you would not appreciate any of these inconveniences. This is the situation we find ourselves in. We need your help to protect our Hunter Valley.

I am strongly objecting to the Maxwell Mine Proposal.

I moved to the Hunter Valley five years ago with my young family. Over this period we have witnessed an enormous change the landscape and the air quality. Much of our beautiful natural environment is now gone forever, destroyed by mining.

In this valley we have world leaders in the production of wine and horses.

"A stitch in time saves nine".

Act now to protect your Australia and its future.
