

I object for the following reasons:-

Good farming land being used, put solar farms on land not suited to farming. No farms, no food, greater cost to everyone.

Devaluation of the land, no proof the land will recover from this in 30 years.

Devaluation of properties in this area. The other home and land owners out here shouldn't have to worry about not being able to sell their properties for a good price later just because one or two people want to put in a solar farm.

What about the effect on the environment, the solar farm will make things hotter, that is no good to anyone, what effect will that have on those living closest.

What if the company goes broke, that stuff will be there forever.

I cannot see how this solar farm is going to be of any benefit to me, the neighborhood or the environment.

If you keep putting good farming land under solar panels there will be no farm land left, Australia will not be able to feed its population.

Bush fire risk, this seems to get brushed under the carpet, their answer is it will be fine that won't happen, that is not good enough clearly they don't know.

What about flooding due to filling in most of the dams.

Restrict the future growth of Jindera will be restricted as no-one wants to live next to a solar farm.

This is dividing the district and making things very uncomfortable for everyone.

The mental health of the residents here is at risk. The strain on people so far has been huge. One day people may want to sell their property and retire, as these days it is preferable according to the government that we are self funded, the property prices will plummet with a solar farm next door, think of the mental anguish the older people in this area will go through as they face the worry that they will not have enough money to live out their life.

I don't like their oh that won't happen it will be fine, too late when it does happen.

There will be more dust, noise and glare in this lovely quiet area.

The roads out here are not great and all the traffic will simply make the roads even worse.

So much more traffic through Jindera township, I bet they don't know they are getting trucks through there every 14 minutes 6 days a week.

No benefit to any of the people living out here except those whose property it is going on and the foreign developer.

Loss of flora and fauna habitat.

Loss of cultural heritage sites.
