

3rd February 2021

My parents Peter & Geanean Gillet own and reside at 360 Tallagandra lane Sutton. Referred to in the EIS, as receptor no 1.

I wish to convey my strongest objection to the approval of the Springdale Solar Development.

I have spent time at the property since 1999, moving permanently to the property with my parents in 2002 when the construction of our home was completed. I lived there for 13 years, till 2015. The area was then and is still now, a rural residential area. In my experience there has never been any form of large scale commercial enterprises operating in immediate or surrounding area. This development is not consistent with use of land or the activities of any of the surrounding properties. It will change the rural amenity my parents currently enjoy to that of an industrial estate.

This is clearly not the best use of the land in this area and not an appropriate location for this type of development. It is my understanding the NSW government has Identified locations within NSW where this type of development is most suited and appropriate.

With this in mind, I respectfully request you reject the Springdale Solar Development from being developed on this site and allow it to be developed in an appropriate area.

Yours

Ryan Gillett
