The Independent Planning Commission
For Culcairn Solar Farm.

My name is Tony Quinn and I have
been a councillor for over three decades.

I have been a farmer since I
left Wagga Agricultural College in 1964.

To repeat what I said on Zoom
on Feb 25th.

I fully support the project, have a great
belief in private enterprise, I want industry to come
into the shire, the L.P.P. allows such industries
to happen.

The dollars Neon would inject into the
community would be marvellous for Culcairn
Council would also benefit greatly from the
financial injection from the project.

I have a parcel of land 1 Km
to the ~~west~~ West of this project. I have owned this
land for 31 years. During this time, 8 years have
been so wet as to require me to move my cattle
else where. Much of the land in the "Neon" project is
very flat like some of my land.

Construction of the project would create create
an enormous amount of work for the Culcairn district etc.

My fellow Councillors have refused to look at the
land. I find it very hard to make a decision on

Something unless I am fully informed.

In the conditions of approval (if it is granted)
I would like one of the ~~condition~~ conditions to
state that a fire unit with 5000 litres of water
capacity be on site. It is a known fact
that rapid response is the key to fighting fires.

Yours etc.

Ad Finnan

Tony Quinn

Councillor Greater Horsham
