Please see the attached Submission.
I would like a response to confirm you have received our submission.

Respectfully
Leah Bywater
We declare that we have not given any political donations at any time.

We would like to request that the Planning and Assessment Commission reject the application for the Wallarah 2 Coal Project (SSD 4974) on the following grounds:

1. Some infrastructure for this proposed mine is bounded the M1, the Doyalson Link Road and Tooheys Road at Bushells Ridge. The infrastructure at this site will consist of a coal crusher, a coal stockpile of 250 thousand tonnes of coal, a rail loop and a coal loader. This infrastructure will operate 24/7 loading in excess of 96 thousand tonnes of coal into open rail trucks every week for the next 28 years.

2. The boundary of our property is 600 meters from the boundary of the proposed mining site. Our only water supply is from rainwater tanks as is the case with all the surrounding properties. Some of these are closer than 600 meters from the boundary.

3. We fear for our families health and wellbeing as it will be humanly impossible to suppress all coal dust, air pollution and noise pollution emanating from the proposed mining processes.

4. This could well result in severe health issues to our family and the other communities affected, from coal related diseases.

5. **There will be many other people within 3 kilometers affected by the mining processes.**
   
   To the south is Lakes Grammar School with approx 1000 students and residents of the Suburb of Warnervale.
   
   To the east is the new multi million development of the Warnervale Town Centre. There are also the current residents of Bruce Crescent.
To the north east is the suburb of Blue Haven.
To the north is the reported development of 1250 residential lots in Wyee. (Lake Macquarie City area)

6. We are believe the Wallarah 2 Coal Project (SSD 4974) has not taken into consideration all the factors which will affect the people and communities surrounding the actual physical location of the loading infrastructure.

Yours Sincerely

Albert & Leah Bywater
