Submission on the WALLARAH 2 COAL PROJECT (SSD 4974)

As a concerned resident of Jilliby NSW I must protest that the PAC have not seriously addressed the issues put forward in the 685 submissions already presented so far by other concerned residents of the Central Coast.

I am concerned that the PAC is ignoring the issues that have been put forward to them on many occasions, those being:

- Loss of Fresh Water supplies**
- Air pollution and public health**
- Subsidence**
- Salty Brine Disposal**
- Lack of Community Consultation**
- The State Government's broken promises.**

It would be only repetitive to detail the concerns under the above heading, as I'm sure the PAC is well aware of them. I endorse previous submissions regarding these issues.

Finally as retired health professional it astounds me that the health and welfare of rural and suburban communities are being ignored for the sake of a polluting energy source for a foreign country. I'm proud to be an Australian and believe the health, welfare and interests of Australians should be a priority for the sake of our future generations.

In your deliberations I trust common sense will prevail and the PAC will put Australians as its first priority.

Yours sincerely,

Maureen Michelle Smith
