

29.11.17.

Demielle Taylor

The Commissioner

Sir/Madam.

I would like to support the Castlereagh Coal, southern extension project.

Were I live on the Back Kuller Road at Portland, my parents property backs on to the Invincible mine at Cullen Bullen. My parents property consists of a agriculture, farming and grazing business.

I am the manager of a local auto parts business in Lithgow for the last two years, previous to that, I have worked in the same industry at Bathurst and Orange. I have always called the Portland area home. even know I had to move for work.

I would like to support Castlereagh Coal, Southern Project, as it will have a big impact on the towns of Portland, Cullen Bullen and Lithgow, help local business to provide support to the mine and a follow on to help business that bring work to the community as well as providing employment for 35 people. and provide training for apprenticeships for the youth so they do not have to leave the area to look for work.

My support for the Castlereagh Coal Southern project is for their support that they are going to give back to the local community.

- \* Recruitment policy - asking employees to live locally.
- \* Where possible using local and regional suppliers for their operation.

- \* Their commitment to project design that ensures any potential environmental or community impacts are avoided.

- \* Minimising risk of impact landscape factor like flora and fauna

- \* A smaller disturbance area to past applications.

- \* Less exposed location further from private residences.

I have lived on the family property at "Pineview" for over 30 years and I fully support the Castlereagh Coal Southern Project as the community need more local industry. I also would not support any suggestion that the area be put under any conservation order as the land that is included in this order my family ~~has~~ <sup>has an interest</sup> ~~in~~ the forestry area. For their agriculture practices, this will impact their income and livelihood. It would also ~~at~~ prevent the area from any future industrial development.

Yours faithfully.

  
Danielle Taylor
