Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Alison Aldred

Subject: Invincible Mine Objection
Date: Wednesday, 29 November 2017 5:44:49 PM

Dear Mr Paul Forward, PAC Chair,

Re. Proposed extension of the Invincible Coal Mine

I most strongly object to the proposed extension of the Invincible Coal mine, now owned by the Manildra Group. This extension would destroy part of the incredible country known as the "Gardens of Stone". This area is arguably the most stunning landscape in NSW, with its ancient, fragile, "pagoda" rock formations. It also contains significant Aboriginal sites and is home to many threatened species.

The extension is located within the former Coalpac expansion projects - these were rejected by 2 independent PACs.

Other reasons for my objection:

- 1) The Invincible Extension Project (IEP) ignores the importance of the pagoda land system and only refers to the pagodas. This serious omission demonstrates no understanding of the conservation values of the western part of Ben Bullen State Forest, as recognised by two PACs, Department of Planning and the Office of Environment.
- 2) Both PACs recognised the area was part of the unique pagoda land system comprising the pagodas and cliffs, steep slopes and woodlands. The IEP is part of the woodlands adjoining the pagodas - an integral part of the pagoda land system that supports the plants and animals.
- 3) The IEP would allow destructive open cut mining in part of the Gardens of Stone region. Twice the independent Planning Assessment Commission (PAC) has comprehensively rejected open cut mining for parts of this region, including the IEP land, finding that the area should have "the highest level of protection".
- 4) Once open cut mined, the land and its plants and animals are gone. The land cannot restore to its former values and it cannot be rehabilitated.
- 5) Approval of the IEP will lead to applications for more open-cut mining in the pagoda land system. Shoalhaven Coal, another company associated with the Manildra group, was granted two new exploration licences around the mine in 2016 (Exploration Licences 8168 and 8169) covering 1368 hectares.
- 6) The IEP would have a big permanent impact for a small amount of nut coal, the primary objective for the modification.
- 7) The IEP would add ugly open cut mining right beside the Castlereagh highway which is the main road to Gardens of Stone area and the tourism destination of Mudgee area. This will make a particularly uninviting impression on tourists to the area.
- 8) DPE's recommendation to approve the IEP will endanger eight threatened species including allowing mining of the habitat for the Squirrel glider and the broad-headed snake.

Yours sincerely,
Daniel Hirschfeld

Subject: Invincible Mine Objection
Date: Thursday, 30 November 2017 9:27:52 AM

Dear Mr Forward

The Gardens of Stone area, near Lithgow, is an incredible landscape that has been in the making for 250 million years. Home to fragile pagoda rock formations, ancient Aboriginal culture and rare and threatened plants and animals, this area has been recognised for its international geological significance and fragile eco-systems.

I object to the proposed extension of the Invincible Coal mine, now owned by the Manildra Group (Castlereagh Coal). The extension is located within the former Coalpac expansion projects which were rejected by two independent Planning Assessment Commissions (PACs) in 2013 and 2014. I strongly object to open-cut mining being approved in this sensitive part of the Gardens of Stone when the 2014 Commission concluded that "the highest and best use of the area is for conservation purposes". The Commission should uphold its previous decisions.

I object to the Invincible Extension Project (IEP) for the reasons set out below, in summary:

- The IEP ignores the importance of the pagoda land system and only refers to the pagodas. This serious omission demonstrates no understanding of the conservation values of the western part of Ben Bullen State Forest, as recognised by two PACs, Department of Planning and the Office of Environment.
- Both PACs recognised the area was part of the unique pagoda land system comprising the pagodas and cliffs, steep slopes and woodlands. The IEP is part of the woodlands adjoining the pagodas - an integral part of the pagoda land system that supports the plants and animals
- The IEP would allow destructive open cut mining in part of the Gardens of Stone region. Twice the independent Planning Assessment Commission (PAC) has comprehensively rejected open cut mining for parts of this region, including the IEP land, finding that the area should have "the highest level of protection".
- Once open cut mined, the land and its plants and animals are gone. The land cannot restore to its former values and it cannot be rehabilitated
- Approval of the IEP will lead to applications for more open-cut mining in the pagoda land system. Shoalhaven Coal, another company associated with the Manildra group, was granted two new exploration licences around the mine in 2016 (Exploration Licences 8168 and 8169) covering 1368 hectares.
- The IEP would have a big permanent impact for a small amount of nut coal, the primary objective for the modification.
- The IEP would add ugly open cut mining right beside the Castlereagh highway which is the main road to Gardens of Stone area and the tourism destination of Mudgee area. This will make a particularly uninviting impression on tourists to the area.
- DPE's recommendation to approve the IEP will endanger eight threatened species including allowing mining of the habitat for the Squirrel glider and the broad-headed snake.

We call on the Planning and Assessment Commission to recognise the high conservation values of the Gardens of Stone area and reject the Invincible Extension Project.

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

This is a region of truly unique and beautiful scenery, with its own delicate balance of flora and fauna. When it is gone, we can never replace it.

Not only would the proposed open-cut mine destroy the landscape for all time, but the resulting pollution would cause unspeakable harm to all wildlife, both macroscopic and microscopic, as well.

Please do not allow the potential short-term financial gains of any company to damage this precious environment for eternity.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Deborah Burns

As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Eva Ramos

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

Subject: Invincible Mine Objection
Date: Tuesday, 28 November 2017 11:23:12 PM

Dear Mr Forward

The Gardens of Stone area, near Lithgow, is an incredible landscape that has been in the making for 250 million years. Home to fragile pagoda rock formations, ancient Aboriginal culture and rare and threatened plants and animals, this area has been recognised for its international geological significance and fragile eco-systems.

I object to the proposed extension of the Invincible Coal mine, now owned by the Manildra Group (Castlereagh Coal). The extension is located within the former Coalpac expansion projects which were rejected by two independent Planning Assessment Commissions (PACs) in 2013 and 2014. I strongly object to open-cut mining being approved in this sensitive part of the Gardens of Stone when the 2014 Commission concluded that "the highest and best use of the area is for conservation purposes". The Commission should uphold its previous decisions.

I object to the Invincible Extension Project (IEP) for the reasons set out below, in summary:

- The IEP ignores the importance of the pagoda land system and only refers to the pagodas. This serious omission demonstrates no understanding of the conservation values of the western part of Ben Bullen State Forest, as recognised by two PACs, Department of Planning and the Office of Environment.
- Both PACs recognised the area was part of the unique pagoda land system comprising the pagodas and cliffs, steep slopes and woodlands. The IEP is part of the woodlands adjoining the pagodas - an integral part of the pagoda land system that supports them plants and animals
- The IEP would allow destructive open cut mining in part of the Gardens of Stone region. Twice the independent Planning Assessment Commission (PAC) has comprehensively rejected open cut mining for parts of this region, including the IEP land, finding that the area should have "the highest level of protection".
- Once open cut mined, the land and its plants and animals are gone. The land cannot restore to its former values and it cannot be rehabilitated
- Approval of the IEP will lead to applications for more open-cut mining in the pagoda land system. Shoalhaven Coal, another company associated with the Manildra group, was granted two new exploration licences around the mine in 2016 (Exploration Licences 8168 and 8169) covering 1368 hectares.
- The IEP would have a big permanent impact for a small amount of nut coal, the primary objective for the modification.
- The IEP would add ugly open cut mining right beside the Castlereagh highway which is the main road to Gardens of Stone area and the tourism destination of Mudgee area. This will make a particularly uninviting impression on tourists to the area.
- DPE's recommendation to approve the IEP will endanger eight threatened species including allowing mining of the habitat for the Squirrel glider and the broad-headed snake.

We call on the Planning and Assessment Commission to recognise the high conservation values of the Gardens of Stone area and reject the Invincible Extension Project.

Yours Sincerely

Cameron Wilkinson

Home to fragile pagoda rock formations, ancient Aboriginal culture and rare and threatened plants and animals, this area has been recognised for its international geological significance and fragile eco-systems.

I object to the proposed extension of the Invincible Coal mine, now owned by the Manildra Group (Castlereagh Coal). The extension is located within the former Coalpac expansion projects which were rejected by two independent Planning Assessment Commissions (PACs) in 2013 and 2014. I strongly object to open-cut mining being approved in this sensitive part of the Gardens of Stone when the 2014 Commission concluded that "the highest and best use of the area is for conservation purposes". The Commission should uphold its previous decisions.

I object to the Invincible Extension Project (IEP) for the reasons set out below, in summary:

- The IEP ignores the importance of the pagoda land system and only refers to the pagodas. This serious omission demonstrates no understanding of the conservation values of the western part of Ben Bullen State Forest, as recognised by two PACs, Department of Planning and the Office of Environment.
- Both PACs recognised the area was part of the unique pagoda land system comprising the pagodas and cliffs, steep slopes and woodlands. The IEP is part of the woodlands adjoining the pagodas - an integral part of the pagoda land system that supports the plants and animals
- The IEP would allow destructive open cut mining in part of the Gardens of Stone region. Twice the independent Planning Assessment Commission (PAC) has comprehensively rejected open cut mining for parts of this region, including the IEP land, finding that the area should have "the highest level of protection".
- Once open cut mined, the land and its plants and animals are gone. The land cannot restore to its former values and it cannot be rehabilitated
- Approval of the IEP will lead to applications for more open-cut mining in the pagoda land system. Shoalhaven Coal, another company associated with the Manildra group, was granted two new exploration licences around the mine in 2016 (Exploration Licences 8168 and 8169) covering 1368 hectares.
- The IEP would have a big permanent impact for a small amount of nut coal, the primary objective for the modification.
- The IEP would add ugly open cut mining right beside the Castlereagh highway which is the main road to Gardens of Stone area and the tourism destination of Mudgee area. This will make a particularly uninviting impression on tourists to the area.
- DPE's recommendation to approve the IEP will endanger eight threatened species including allowing mining of the habitat for the Squirrel glider and the broad-headed snake.

We call on the Planning and Assessment Commission to recognise the high conservation values of the Gardens of Stone area and reject the Invincible Extension Project.

Yours Sincerely
Philip Jackson

Subject: Submission opposing the Department of Planning and Environment's assessment of Invincible Colliery 07_0127 Mod 5 (D490/17)
Date: Wednesday, 29 November 2017 7:45:37 PM

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

john stone

Date: Wednesday, 29 November 2017 5:46:31 PM

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Subject: Invincible Mine Objection
Date: Wednesday, 29 November 2017 6:45:51 PM

Dear Mr Forward

The Gardens of Stone area, near Lithgow, is an incredible landscape that has been in the making for 250 million years. Home to fragile pagoda rock formations, ancient Aboriginal culture and rare and threatened plants and animals, this area has been recognised for its international geological significance and fragile eco-systems.

I object to the proposed extension of the Invincible Coal mine, now owned by the Manildra Group (Castlereagh Coal). The extension is located within the former Coalpac expansion projects which were rejected by two independent Planning Assessment Commissions (PACs) in 2013 and 2014. I strongly object to open-cut mining being approved in this sensitive part of the Gardens of Stone when the 2014 Commission concluded that "the highest and best use of the area is for conservation purposes". The Commission should uphold its previous decisions.

I object to the Invincible Extension Project (IEP) for the reasons set out below, in summary:

- The IEP ignores the importance of the pagoda land system and only refers to the pagodas. This serious omission demonstrates no understanding of the conservation values of the western part of Ben Bullen State Forest, as recognised by two PACs, Department of Planning and the Office of Environment.
- Both PACs recognised the area was part of the unique pagoda land system comprising the pagodas and cliffs, steep slopes and woodlands. The IEP is part of the woodlands adjoining the pagodas - an integral part of the pagoda land system that supports the plants and animals.
- The IEP would allow destructive open cut mining in part of the Gardens of Stone region. Twice the independent Planning Assessment Commission (PAC) has comprehensively rejected open cut mining for parts of this region, including the IEP land, finding that the area should have "the highest level of protection".
- Once open cut mined, the land and its plants and animals are gone. The land cannot be restored to its former values and it cannot be rehabilitated.
- Approval of the IEP will lead to applications for more open-cut mining in the pagoda land system. Shoalhaven Coal, another company associated with the Manildra group, was granted two new exploration licences around the mine in 2016 (Exploration Licences 8168 and 8169) covering 1368 hectares.
- The IEP would have a big permanent impact for a small amount of nut coal, the primary objective for the modification.
- The IEP would add ugly open cut mining right beside the Castlereagh Highway which is the main road to Gardens of Stone area and the tourism destination of Mudgee area. This will make a particularly uninviting impression on tourists to the area.
- DPE's recommendation to approve the IEP will endanger eight threatened species, including allowing mining of the habitat for the Squirrel Glider and the Broad-Headed Snake.

We call on the Planning and Assessment Commission to recognise the high conservation values of the Gardens of Stone area and reject the Invincible Extension Project.

Yours Sincerely

Karen Hising

Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Kristene Smith

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Michael Shea

Subject: Invincible Mine Objection
Date: Wednesday, 29 November 2017 6:40:18 PM

Dear Mr Forward

The Gardens of Stone area, near Lithgow, is an incredible landscape that has been in the making for 250 million years. Home to fragile pagoda rock formations, ancient Aboriginal culture and rare and threatened plants and animals, this area has been recognised for its international geological significance and fragile eco-systems.

I object to the proposed extension of the Invincible Coal mine, now owned by the Manildra Group (Castlereagh Coal). The extension is located within the former Coalpac expansion projects which were rejected by two independent Planning Assessment Commissions (PACs) in 2013 and 2014. I strongly object to open-cut mining being approved in this sensitive part of the Gardens of Stone when the 2014 Commission concluded that "the highest and best use of the area is for conservation purposes". The Commission should uphold its previous decisions.

I object to the Invincible Extension Project (IEP) for the reasons set out below, in summary:

- The IEP ignores the importance of the pagoda land system and only refers to the pagodas. This serious omission demonstrates no understanding of the conservation values of the western part of Ben Bullen State Forest, as recognised by two PACs, Department of Planning and the Office of Environment.
- Both PACs recognised the area was part of the unique pagoda land system comprising the pagodas and cliffs, steep slopes and woodlands. The IEP is part of the woodlands adjoining the pagodas - an integral part of the pagoda land system that supports the plants and animals
- The IEP would allow destructive open cut mining in part of the Gardens of Stone region. Twice the independent Planning Assessment Commission (PAC) has comprehensively rejected open cut mining for parts of this region, including the IEP land, finding that the area should have "the highest level of protection".
- Once open cut mined, the land and its plants and animals are gone. The land cannot restore to its former values and it cannot be rehabilitated
- Approval of the IEP will lead to applications for more open-cut mining in the pagoda land system. Shoalhaven Coal, another company associated with the Manildra group, was granted two new exploration licences around the mine in 2016 (Exploration Licences 8168 and 8169) covering 1368 hectares.
- The IEP would have a big permanent impact for a small amount of nut coal, the primary objective for the modification.
- The IEP would add ugly open cut mining right beside the Castlereagh highway which is the main road to Gardens of Stone area and the tourism destination of Mudgee area. This will make a particularly uninviting impression on tourists to the area.
- DPE's recommendation to approve the IEP will endanger eight threatened species including allowing mining of the habitat for the Squirrel glider and the broad-headed snake.

We call on the Planning and Assessment Commission to recognise the high conservation values of the Gardens of Stone area and reject the Invincible Extension Project.

Yours Sincerely
Neville Burns

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Alex McCarthy

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters

Agree with all of the above. As a regular visiror to the Gardens of Stone, have see the outstanding beauty of this area and value ut both for walking and photography. These are fragile landscapes- which have been damaged and undermined- please leave it for "friendlier" purposes which would bring far greater benefits to our communities and bring a wealth beyond this short destructive period of open- cut.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely
Bernadette Becher

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Bernard Curran

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Cate McCarthy

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Danielle Wood

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Darryl Wood

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the invaluable and irreplaceable Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue unnecessary coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department. There can be no offsets when the area under threat is unique in terms of its conservation and scenic values.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed

2014 that the pagoda landscape consists of the pagodas and woodlands below them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Don-Thomas Williams

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission.

The PAC has previously rejected open-cut coal mining in this woodland . This proposal will also destroy a valley woodland area of conservation significance and should be rejected.

Please refuse Manildra's proposed mine expansion and prevent further open-cut mining in the Gardens of Stone region.

Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Evelyn Parnassus

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Greg Wilkins

This part of Australia is of rare beauty and of the highest intrinsic value to our country, its natural systems, its animals and people.

To cut open and destroy so much of it in the name of short term profit would amount to a major crime.

I'm passionately appealing to the decency and common sense of all people involved in the planning and decision making of this project.

We all have a responsibility towards this country and the future of it and its inhabitants.

Yours sincerely,
Inge

This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Janet Mckenzie

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

It is time that governments in Australia began to encourage the move away from coal mining to a more sustainable society/economy. The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Joanna Carroll

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

Open cut mining causes the extinction of all native wild life and its habitat. This is an unacceptable price to satisfy the Manildra Greed trying to squeeze the last drop of economic wealth from a dying industry. It will not provide more long term jobs because the whole operation will be driven by artificial intelligence production methods.

It makes no sense to destroy the natural environment which contributes to the local economy in tourist dollars.

Such proposals make me ashamed of my government which supports such vandalism.

As of this day I will boycott all Manildra products.

The Commission may publish my name, location and this submission.

Thank you for the opportunity to comment on this mining proposal.

Yours sincerely, John Inshaw. [REDACTED]

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Joshua Steadson

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Kathy Barbour

Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

The recent Qld electoral results must surely signify you cant continue to ride roughshod over community opinions. You govern for the community, not for mining companies! I grew up in Lithgow and object to this desecration and environmental vandalism

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland

is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Kay Williams

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed

2014 that the pagoda landscape consists of the pagodas and woodlands below them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

It is well known that the future of coal mining is uncertain, that with the prospect of the Carmichael mine possible, many other coal mines will close. This cannot be a sound economic or environmental proposal.

Furthermore, the true costs, including fully costed environmental costs have clearly not been taken into account. I call on you to develop procedures in project assessment to include all environmental costs and benefits, fully evaluated.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

LorraineHardwick

I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Lubi Fiedlerova

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

It becomes tedious to have to repeatedly point out the objections to the continuous assault by mining companies on these very important areas of our native forests and biodiversity, ecosystems which really need to be preserved to the future generations and the health of our environment, planet.

I know this area of NSW and have visited the area many times over my lifetime. It is unique and beautiful and deserves to be conserved. Mining is short term and wrecks the environment and waterways. The previous PAC decisions must be upheld.

Yours sincerely,
Lyn Mews

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. As well as the impact of further burning of fossil fuels on climate change which is a very serious matter, I have observed that mining companies do more harm than good to the economy and to society in general, as well as the particular and long-lasting devastation of the environment

Economically, it is ridiculous to allow permanent damage to occur to one of the great tourism assets of NSW. The amount earned in the short term is not going to balance out against the future income and enterprise from tourism, that would occur in the same area, but which will be no longer possible.

Socially the impacts are also devastating in both short and long term. While some jobs may be created temporarily, many of these will be relatively short term (other than a few positions). Mining is moving to greater automation and the use of heavy equipment has already eliminated most mining jobs. Meanwhile the people of the locality endure noise, dirt, increased traffic and light pollution while the mine operates, and afterward there is a devastated landscape where once was beauty.

Environmentally, this is a disaster. You cannot plant seedlings elsewhere and claim you are replacing 300 year old hollow-bearing trees. I have doubts about the effectiveness of the processes for removal of animals. Where it takes place at all, it will only target large animals, certainly not all the insects and soil biota that is killed off.

I do not believe that we in NSW can afford the luxury of digging up and selling one more hectare of untouched or relatively intact Australian bushland.

Thank you for the opportunity to comment on this mining proposal.

Yours sincerely, Lyndal Breen

Dear Mr Forward,

Submission I Oppose the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I strongly object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Maria Bradley

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Melinda Jade Martin

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Pat Ross

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Vivian Baruch. M. Couns.

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape. We are a day closer to a class action by people affected by the corruption so evident in the NSW planning system. Corrupt individuals will soon be made to pay!

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Robert McLaughlin

Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

An essential consideration regarding this outrageous mine expansion. Last week saw the world get together once again, this time in Bonn, Germany, for the World Climate Change Conference, stressing again the importance of keeping coal in the ground, so as to mitigate the rapidly increasing ocean temperature. Not only will this proposal decimate australia's unique heritage and landscape--representing major future tourism dollars and employment--but on a global level, it represents a contribution to the disastrous climate destruction. This must not proceed.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Ruth east

Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Stephen Corry

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Tracy Mortimer
