Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Fiona Hamilton

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

leave the place alone, whilst not spectacular they are unique Hawkesbury Sandstone outcrop which should be left intact...

Yours sincerely,

Roger Skinner

Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Margaret Mangelsdorf

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

This is pure and utter vandalism and mustn't go ahead.

Yours sincerely,

Deni Sevenoaks

Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

shaun adams

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Jo Di Pietro

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Marion Jones

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Lara Mirecki

Dear Mr Forward,

I know I currently live in Victoria but I have walked in the Gardens of Stone area when I lived in Sydney and soon intend to return to NSW to live. In addition to the comments below, I have seen with my own eyes how beautiful the woodland area is and also how brittle the pagoda like structures can be. They are a magnificent and unique public resource and as such should not be threatened either visually or physically.

This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Stephen Marshall

Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Vicki Bunce

As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
John Beasley

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bthisullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. This area is a miracle of creation. It can never be replaced. It must never be mined

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

GWEN Warren Warren

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Maurice Nicholson

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Thomas Klikauer

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Julie Paulus

This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

Yours, Fred Green PhD

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.
