Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Livia Cucuzza

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

There should be no new coal mines, or expansion to existing mines. All investment should go towards renewables!

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Teresa Harrington

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Daniel Bolotin

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

For the sake of human health, and the health of the climate, the world needs to reduce it's use of coal to zero - not dig up more of the stuff. With falling world demand, and the falling price of coal, any expansion would be a financial risk.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Brian Mollan

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Russell Reinhardt

This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Zac Forster

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name in this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Fiona Goodman

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

I further believe that my generation has already reaped the benefits of millions of years worth of fossil fuel at the expense of generations to come and it is time we focused on solutions rather than proceeding with more fossil fuel mining. We can at least leave them the beautiful conservation areas like this intact. The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Dr Jennifer Brown

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. It will be an environmental disaster and have an irreversible deleterious impact on the flora and fauna of the area. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation. I thoroughly agree with the Commission.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. As an environmental scientist I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. This is not evidence based policy. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. These licences should never have been approved especially when no fauna and flora surveys have been carried out. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department. If a survey was to be carried out, from experience it is highly probable that some species, in particular invertebrates, would be found to be endemic, i.e. restricted to this site.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut

mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape. I am horrified and baffled as to how such a proposal could be approved.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. It is not possible to completely recreate the original landscape together with its fauna and flora. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape. Offsets have been shown many times to provide false compensation for environmental destruction.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Penelope Greenslade

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Once these natural wonders are destroyed they are gone forever, and the wildlife from this natural habitat is also gone. The next generation will never be able to appreciate their natural beauty.

Yours sincerely,

Maureen Harris

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Adrian Baljeu

Dear Mr Forward,

This Submission Opposes the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

The continued expansion of fossil fuel extraction and burning, will make it impossible for Australia to meet the Paris agreement to limit global warming to 2 degrees. We have already reached the point where this is impossible. For the sake of the next generation, we must take responsibility for an immediate, just transition to 100% renewable energy.

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Ken Goh

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. Conserving our natural environment is vital and more valuable than the profits of mining companies.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

Mining is destroying so much of our natural heritage and poisoning our land. The greed expressed by companies, with disregard for future generations, is astonishing.

From experience there is very little benefit for the community or the country from such projects and areas are left destroyed when the companies leave.

Please reject Manildra's proposal or any further requests to expand.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Vicki Kable

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Lucille Downing

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Date: Sunday, 3 December 2017 4:56:20 PM

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

As a planet we have lost too much natural beauty which can never be replaced.

Every day endangered species of flora and fauna are being lost so that capitalism will reign supreme. It is time for Australia to show the way, to prove to the world that we can and will put an end to loss by greed. We must nurture our planet - it is the only one we have! We must not leave a wasteland of opencast mining to future generations.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Julia Kerr

It is essential to preserve our wilderness and heritage for future generations. Open cut coal mines, fracking etc just destroys nature and much can never be restored. Renewable energy is the way to go, not coal.

Yours sincerely,

Kiki Loch-Wilkinson

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I strongly and vigorously object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be highly inappropriate and troubling to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's spurious and damaging recommendation to expand the open-cut area and continue coal production for eight years given the global decline in coal use and low market price of coal. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while with intent and guile, at the same time, applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Craig Buckley

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Diane Brooks

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

P L E A S E, Australia can NEVER recover from these losses to our unique, natural geography, flora and fauna that is being further eroded every day by big multinational companies whose main interest lies in the money they will make. We are LOSING Australia's heritage !! And I'm just so sick and tired of Government bureaucratic Departments giving the green light to all sorts of destructive measures that destroy our country more and more each day. You people are our Gatekeepers, and should be protecting our wonderful land, not eroding more and more of it.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

I have walked this unique and beautiful area on many occasions with students undertaking the Duke of Edinburgh Award Scheme. The purpose of which is to instill a love of the environment, conservation, resilience and love of being outdoors. This special place so close to Sydney is already being ravaged by the effects of Underground mining. To allow this open cut mine to further gouge this stunningly beautiful area is a crime. We are trying to teach our youngsters to have a healthy respect for our country. A hard task when we see the destruction created by big business.

Yours sincerely,

Carol Gill

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Nicole Stephens

Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

I'm writing this submission to Oppose the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. In this time of serious carbon pollution affecting our climate and our responsibility to the Paris climate agreement we must speedily transition away from coal and invest in renewables. I have no other option than to state that Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. There is no possible excuse for mining in this sensitive region. The natural beauty of the area must be protected. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland

is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Angela Burrows

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Julia Watkins

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Campbell Usher

Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

I have visited parts of the Gardens of Stone and am overawed by the astonishingly unique pagoda formations and vulnerable flora and fauna. As a wildlife carer and volunteer with WIRES I am also aware that the destruction of native habitat is threatening the biodiversity of our native fauna. It is imperative that we protect such a vital landscape for our own well-being, and the well-being of future generations, human, plant and animal.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Wendy Stokoe

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Catherine le Fay

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Gitte Cairns

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

This company grows bigger and walks over everyone in its path! I live in Manildra and we fought hard to keep the coal out, so they went on a donation campaign and threw money and free publicity at local projects! Said how good they were for the town with local employees! Pity most of them including the ones they bought from overseas live in places like orange and support that economy and community. They can't be trusted, years and millions of dollars and the canola mill still smells, so god help the environment.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Zelda Giblett

- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the "highest and best use of the area is for conservation purposes" and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra's 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely, NO MORE OPEN CUT MINES PLEASE

Sue Wells
