Good afternoon,

RE: final written submission regarding the proposed energy from waste (incinerator) at Eastern Creek

I wish to express my concern about the proposed energy from waste (incinerator) at Eastern Creek. It is shocking when you consider how close the proposed facility is to residential suburbs, including my own suburb of Minchinbury. I cannot even begin to understand how such a facility is being considered when it is so close to the homes of so many people. I worry for the health of my two young children, our relatives who live nearby, and all our friends/neighbours who will be forced to breathe in the emissions from >500 tons of waste that would be incinerated each year.

I truly hope the IPC will take into account the many negative aspects of the proposal, including:

- close proximity of the facility to residential areas and the homes of a large number of people
- strong likelihood of detrimental health impacts caused as a result of the emissions from the facility
- not advocating pollution causing means of generating energy (goes against the push for clean energy)
- the strong opposition to the proposal from so many stakeholders (including members of the local community, Blacktown council, politicians from various parties, Dept of Planning and Environment, and NSW Health)

Regards,

Christopher Nathan
