

My name is Narelle Sunderland.

I am a member of the Clean TeQ Sunrise Community Consultative Committee.

I am a member of the Fifield community and live and own with my husband Garry [REDACTED] there are two homes which I live with my husband Garry and in the 2<sup>nd</sup> home my daughter Nicole and her son. Our eldest daughter & husband and 2 sons live and operate their farm 10kms towards Tullamore. farming is ours and their future.

I am involved in our small communities of Tullamore, Fifield, Trundle.

Our farming enterprise consist of Cropping, Beef cattle, Dorset, Merino's , First cross Ewes producing prime lambs for market.

Our home is situated on the northern boundary adjacent to the mine less than 1.5 kms from the proposed (waste dump site). Currajong Park has been my **home** for 40 years and this is where we raised our 3 daughters. Living on a farm is great life style with very hard work it has some challenges with drought and floods, low commodity prices but the plus side at the commodity price of our produce is very economic at the moment.

I recognise the economic benefits that will come from this project with employment and growth in our communities. I don't oppose the propose mining project.

What we as closest neighbours are seeking, are honest and transparent consent conditions that will safeguard our environment and protect us from adverse impacts for us and future generations.

When this is in place than we can confidently support the project. But we need to be assured that if this project goes ahead, it will not be at our expense.

We have a beautiful productive farm and we are grateful that we have **CLEAN AIR AND THE QUIET DAYS AND THE CLEAR SILENT NIGHTS.** When the mine is operational this will be no existent .

I am concerned about the extent to which the noise, dust, visual pollution and emissions will affect our health and lifestyle and our farming business. During the operations of the previous mine the magnesite dust and mining dust would fall on our roof and wash into our rainwater tanks. And this wasn't a chemical process and a much smaller operation. The noise from the dozers and the processing could be heard day and night.

If Clean TeQ, and the Department of Planning honestly guarantee that the modelling relating to noise, dust and emissions from the site is accurate, then there should be no question is reinstating the voluntary acquisition condition.

My concern for the environmental impact, erosion, contamination of soil, groundwater, surface water.

Surface water coming through is of great concern when there is a large amount of rain will the channelling hold it???

Please refer to Des Wards water report.

We rely on the water that comes from the beginning of the water shed flowing from the south through the mine site this fills 6 dams on our property. No water no stock no income.

The value of our properties which is our superannuation and legacy to our children and grandchildren will drop to 25% to 60% of its value.

I fully support the requested amendments to the proposed Consent Conditions. Schedule 3- Environmental performance Conditions that Helen Quade submitted on behalf of Fifield Near Neighbours.

I feel that the bypass is a must for the safety of the normal traffic and the residents of Fifield as there has been numerous accidents in the village without the added large trucks and vehicles.

I love where we live and our lifestyle. We all hope that we will be able to continue to love it for many years to come. None of us wants to sell and move

We all accept that there may be impacts from this project which negatively impact on our lifestyle, which do not constitute breaches of the acceptable limits of noise and dust and emissions. We will have to consider our options. But what is not fair to expose us to consequences we shouldn't have to suffer and can't escape.

Please read and support the request for the amendments for the proposed Consent Conditions. I would like to be confident that if this project is given the green light its won't be for the detriment emotionally, financially and physically. I would like some security that our lives will be unjustly impacted.

I would like to thank you for listening to my concern. At the end of the day this is OUR HOME.
