We are at a critical point in human history. The decisions we make now will impact on generations into the future. We have a climate and extinction crisis. Congratulations to the commissioners for your decision to include conditions relating to the scope 3 greenhouse gas emissions for the Wambo project. However it is important to note that the Paris commitments are not sufficient to avoid disaster. The agreement itself says the targets will need to be ramped up to achieve the 2 degree target. Yet this mine is seeking approval to mine coal decades into the future. Please think of our children and grandchildren when you make your decision.

Thank you

Tony Lonergan
