Subject: inquiry into PFAS chemicals Holsworthy area Fire fighting Foam

Hon Craig Kelly Member for Hughes Hello Craig as you are aware there is a inquiry into the impact of the PFAS chemicals used in fire fighting operations and I rang there Hotline number and I received a call from Lesley advising me that they expect a further community meeting in September October outlining further results in the inquiry and she stated that the Moorebank Intermodal company could be involved in this community meeting and a final report possibly out towards the end of the year

My concern is that given the recent public hearing of the Independent Planning Commission and with submissions being extended until the 7th July 2019 there could be matters in the PFAS inquiry that could have a impact on the Moorebank Intermodal matter and with the knowledge that there was concerns in the original Housing estate at Wattle Grove particularly lead concentrations that a decision might be made in the stage 2 Moorebank Intermodal western precinct which would exclude any possible findings in the PFAS inquiry. I request you make representations on our behalf to find out any possible repercussions to residents in relation to the both matters

Kind Regards John Anderson President Raid Moorebank [REDACTED] NSW
