**Subject:** Objection: Santos Narrabri Gas Project  
**Date:** Tuesday, 7 July 2020 3:18:28 PM

---

Dear Sir/Madam,

I write to oppose the Narrabri Gas Project and ask the Commission to reject this proposal.

Please do not include my personal details on your website.

I object on the grounds below:

- ~ the mining process is destructive
- ~ we must decarbonise our economy asap and this project will further entrench damaging gas technologies for many years into the future
- ~ renewables and batteries are already a better alternative and these technologies are advancing rapidly and getting cheaper
- ~ this project will threaten local ecosystems and fauna and flora that we should be protecting - especially after the devastating bushfires this year
- ~ there is strong evidence about damage to aquifers and groundwater supplies from CSG
- ~ damaging groundwater threatens the entire economy of this region
- ~ massive use of groundwater will remove this from agricultural use, undermining farming and local communities

This is a destructive project that should not be allowed to proceed.

Yours Sincerely,

[REDACTED]  
Chippendale
