Subject: Santos coal seam gas project should not be approved
Date: Thursday, 16 July 2020 4:09:52 PM

The Chairman, Independent Planning Commission

I wish to make a comment on the proposed Narrabri Gas Project.

It's scarcely credible that consideration is being given to such a destructive activity in NSW bushland and forests.

Coal seam gas extraction is an invasive development, akin to a noxious and invasive weed from which the environment never recovers.

I object to the proposed Narrabri Gas Project and ask the Independent Planning Commission to reject this project.

New gas production is an unnecessary and dangerous step in Australia's efforts to tackle climate change. More appropriate and sustainable energy options such as solar and wind are the desired solutions for the 21st century.

Furthermore, activities such as coal seam gas extraction which threaten the quantity and quality of groundwater should not be permitted.

For these reasons I strongly object to the Narrabri Gas Project. Thank you for the opportunity to comment. I look forward to hearing from you in regards to this submission.

Yours Sincerely,

Colin Burman
