**Subject:** Re: URG: Questions for David Kitto wrt Narrabri Gas Project

Dear Casey,

Thank you for forwarding my question to the Commission. My original email included a mistaken inference that Professor Kemp's report also examined hydrogeological impacts, and as Counsel Assisting correctly pointed out, Professor Kemp's report related solely to social impacts. While we don't believe that Professor Kemp has raised her concerns with the Department itself, she has expressed those concerns in exchanges with Dr. Rebecca Lawrence of the Sydney Environment Institute, and we believe that it would assist the Commission to call Professor Kemp to give evidence, or to ask David Kitto whether they relied on any other material to make an assessment of social impacts beyond Professor Kemp's research and the proponent's EIS.

Kind regards,  
Jonathan
