Subject: Submission of Objection: Santos Narrabri Gas Project
Date: Tuesday, 21 July 2020 1:33:19 PM

Dear Madam/Sir,

I am writing to make a submission on the Narrabri Gas Project.

I won't bore you with the details on how this project, if approved, will impact the climate, endangered species, underground water, because I am assuming you know this already. And if you don't, I suggest you educate yourself and do your job.

I'm writing as a mother who cares deeply for her children and wants them to enjoy life as much as I have. I want my kids to have a future, to be able to enjoy the outside world, to not live in a state of constant anxiety regarding the climate. But let's be clear here, the climate catastrophe we are heading to if projects such as this one go ahead will also impact your own children's future. When they grow and ask you what you did for their future, will you say you were involved in approving a gas project? Will you quote "jobs and prosperity"? Because you do know will be no jobs or prosperity on a dead planet, right?

There is a worldwide consensus on how we should move towards decarbonising our economy as fast as we can. This project makes absolutely no sense, except for the short monetary compensation the government will receive in terms of royalties paid by Santos.

I beg you to use your position for good, for our environment, for our climate, for our children, for our planet.

Thank you for the opportunity to comment. I look forward to hearing from you in regards to this submission.

Yours Sincerely,

Araceli Robledo.
