I **strongly** object to the Coal Seam Gas Pipeline and the Narrabri Gas Project.

Our family property is in the Warren NSW Shire - and depend on the water from the Great Artesian Basin for our stock and household needs.

The Government should realize the importance of the GAB - during the drought, when Bourke and other towns were short of water - another bore was sunk.

The Great Artesian Basin needs to be protected.

Why should we sacrifice our country's future when we **export** so much natural gas??

Rose Marie Perry
