

~~I~~ I object to the Santos Narrabri Gas project. I believe that the times have been altered and that CSG will have horrible consequences on not only the biodiversity but also the effects of climate change because of the fossil fuels from coal seam gas. I'm only 34 and the impact of climate change is going to affect the way that I live. Climate change ~~is~~ has not been addressed in this assessment report. Also the Pilliga Forest is being destroyed to make roads and gas wells.
