To whom it may concern.

I am writing to voice my very strong objection to the proposed Narrabri gas project by Santos. I am 68 years old and have been a primary producer for my entire working life.

The chance that ground water aquifers could be affected and the damage to the environment plus to many other reasons that this proposal should not be considered or acted on.

Many of my friends are farmers and they are all very concerned that Santos will get their way.

Regards Garry Wright.
