

Narrabri /Santos Coal Seam Gas Project

NO,NO, NO.

Our family has farmed here in Willala since 1867. We live on a dryish ridge against the Pilliga scrub.

With careful management of the water available, our farm has thrived. In 1988 we won the Brownhill Cup given for conservation farming

Our 2 sons now carry on the 4th and 5th generation here.

If Santos drills wells as close as 15km and drains our aquifer, our farm will become a dry wasteland.

Please look again at the wealth of scientific information gathered against drilling.

Again, no, no, no.

Mrs. Jan Donaldson,

“Braemar”

1676 willala Rd,

Willala, nsw, 2382
