to the community every
three years.

There seems to be
several unknowns e.g.
possible movement of
methane gas.

I urge that this matter
be given reconsideration

Yours faithfully

Janice Jackson

Dear Sir,

I wish to register
my total opposition to the
coal seam gas development
Snatos proposes in the North
West Region of New South
Wales. As Australia is one
of the driest continents in
the world I cannot under-
stand the reasoning behind
this decision. The impact
on farmers, the environment
and the loss of precious
water is invaluable.

I understand that
ground water assessments
will only be published

P.T.O
