To the Independent Planning Commissioners
Submission regarding Narrabri Gas Project
Code SSD 6456

Dear Sir/Madam

I recently learnt that NSW Member for Barwon, Roy Butler recently sponsored a bill in NSW Parliament to put a stop to CSG mining until all 16 of NSW chief scientists recommendations made in 2014 were implemented.

I was devastated to learn this bill was voted down by Liberal & National Party members.

Why aren't they listening to farming people and rural communities.

The safety & security of our underground water is paramount.

In 2016 a major survey of our Gilgandra residents indicated over 98% of those surveyed (3,000 residents over 16 years of age) did not want CSG mining in our region.

I trust you will consider the impact on Australia's Food Bowl & stop this CSG project going ahead.

Yours sincerely
Jennifer E. Stockings (mes)
