Dear Sir, Madam,

I am very much against the Narrabri Gas Project. I work here in Coonamble in an aged care facility. The elderly rely on a good source of clean, fresh water, for their daily living & existing well being. We need our clean drinking water for ourselves & our residents. If we have no water we have no life, no family, no nothing. Gas may be needed by money people & giant companies that have plenty of money, but not much on compassion. This is our town, our families our life styles & our homes. We all need the water, we don't all need the gas. Leave our town & our community alone. Don't destroy our world, our homes, our jobs. Please leave us in peace. Our people be them young or old need our little peace of clean, fresh air, clean water & our personal space, please don't destroy our lives, just to pick up some more of the almighty \$\$\$\$. We are such a small piece of a big world, please go somewhere else & please leave us in peace & alone, with our clean water, clean air & jobs & our homes. If the water goes "Where" do we all go & "Where" do we put our aged & our frail.

Please leave us in PEACE.

yours sincerely  
Mrs. J. Thomas.
