As a grain & beef producer good quality water is integral to our farming operation - poor quality or no water = no farm.  
Gas extraction claims to be around 25 yrs. In that time they can damage a lifetime of agricultural production.  
Our farms also relies on our regional town. Without good quality water we have no town.  
Renewable energy are more efficient & longer term projects without the toxic waste. They are the only way to take us forward

Please continue on back side.

Gas will devalue our land for agriculture  
& insurances are proving to be difficult to obtain

- when the gas is gone its gone - no gas & no money.

Agriculture & renewables can work together.

- we value our good health & thank clean air, clean water & a sustainable food supply along with a stable climate for it

We would like to keep it that way by keeping our agriculture sustainable & clean.

- we need to protect our right to clean air, clean water for our grandchildren & beyond.
