I write as a farmer and landholder of "North Woodside" in the Coonamble and Warren Shires and former Mayor of Coonamble Shire for seven years and councillor for sixteen years.

I AM TOTALLY OPPOSED TO THE PROPOSED NARRABRI GAS PROJECT FOR MANY REASONS.

1. It will put at risk the Coonamble Town Water Supply through depressurisation and water loss in the sandstone of Pilliga by removal of over 30 billion litres of water. Our rural community CANNOT EXIST without this water supply being clean and available.
2. As a farmer I cannot put my stock at risk of drinking contaminated bore water - heavy metals, waste and salt

Please continue on back side.

waste will end up on our paddocks. We producers are proud of our "CLEAN AND GREEN" world wide reputation for our cattle sheep and grain - valuable and hard earned. Why risk this for an over supplied global gas market??

3. CHILD HEALTH

We demand our children have access to unpolluted water and unpolluted food - that is why we live where we live.

The toxic emissions from C.S.G. chemicals and drilling fluids have a destructive history to the inhabitants health both in the U.S.A. and Australia's Queensland Downs country. This is not to mention the spread of metallic waste water and huge salt wastes!

QUESTION: Why should we risk farmers and citizens health and wellbeing for the sake of short term gain by an overseas owned entity with a proposed life of 17 years?
