1) C.S.G. cannot be safely managed when only a low % of governments own key requirements are met.

2) Santos will remove at least 37.5 billion litres of water over 20 years. This volume of water will severely effect the southern recharge of the C.A.B. and hundreds of boxes, both now & future, in Queensland & N.S.W.

Please continue on back side.

3) Possible contamination of the C.A.B. and other waterways will put Australia's bio security at risk. The treatment and disposal of toxic water waste and toxic salt have many questions unanswered by Santos.

4) The economics of Santos contracting and working the project are doubtful compared to renewables creating more jobs over time.

5) Good safe living conditions are paramount in northern Western N.S.W. and the by products of the Hornsby gas project do not these conditions.
