Of governments requirements of 16 recommendations, only 2 have been implemented. Concerning such a Vital Commodity as Water being involved in this rushed decision making is Totally Unacceptable.
There is a very dangerous chance of contamination of Bore Water in G.A.B, and other waterways.

Please continue on back side.

If the Narrabri Gas Project goes ahead it may produce gas for a limited number of years, also toxic waste water & toxic salt waste with a big chance of contamination of the G.A. Basin.

The availability of a good, clean, reliable supply of Great Artesian Basin Bore Water in this North Western Area of N.S.W. enabled many local cities, towns, farms & stock to survive our last, driest, longest Drought on record in Australia, the Driest Continent on the Planet

As a Great Grand Parent, I would expect our descendants & their descendants to live in safe, uncontaminated conditions & to not have to pay for damage to water, land & health caused by a Rushed, Wrong Decision of N.S.W. Government
