To the independent planning  
commissioners submission for the  
Narrabri Gas Project - Code 5506456

Dear Sir/ Madam

I wish to object  
to the company's plans mainly  
because of the risks to groundwater  
which covers a huge area and  
would affect multiple regional  
communities. The host of bad  
experiences from existing gas fields  
demonstrate the other negatives  
which take the shine off the company  
and their propaganda. Food security  
is more important than short term  
profit

Yours faithfully

Ross Stockings.
